1. Conventions & Globals

Base URL

https://api.eventra.app/v1

Auth Header (all protected routes)

Authorization: Bearer <jwt_access_token>

Standard Response Envelope

```
{
  "success": true,
  "data": { ... },
  "message": "Optional message",
  "meta": { "page": 1, "limit": 20, "total": 150 }
}
```

Error Response

```
{
  "success": false,
  "error": {
    "code": "VALIDATION_ERROR",
    "message": "Human-readable message",
    "details": { "field": "Error for this field" }
  }
}
```

Pagination Query Params

?page=1&limit=20

Role-Based Access

Every user has one active role at a time:

Role enum | Value | Dashboard Route

attendee | attendee | /home

organizer | organizer | /organizer

service_provider | service | /service-provider

2. Data Schemas

2.1 User

```
{
  "id": "USR-001",
  "fullName": "Arjun Sharma",
  "mobile": "+91 98765 43210",
  "email": "arjun@example.com",
  "role": "attendee",
  "selectedCity": "Mumbai",

}

```

3. Auth

POST /auth/register

Register a new user account.

Request Body:

```
{
  "fullName": "Arjun Sharma",
  "email": "arjun@example.com",
  "mobile": "+91 98765 43210",
  "password": "SecurePass@123"
}
```

Response: 201

```
{
  "success": true,
  "message": "OTP sent to +91 98765 43210"
}
```

POST /auth/send-otp

Send or resend an OTP to a mobile number.

Request Body:

```
{ "mobile": "+91 98765 43210" }
```

Response: 200

```
{ "success": true, "message": "OTP sent" }
```

POST /auth/verify-otp

Verify the OTP for a mobile number. On success returns JWT tokens.

Request Body:

```
{
  "mobile": "+91 98765 43210",
  "otp": "123456"
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "accessToken": "eyJ...",
    "refreshToken": "eyJ...",
    "user": { /* User schema */ }
  }
}
```

POST /auth/login

Login with mobile + password.

Request Body:

```
{
  "mobile": "+91 98765 43210",
  "password": "SecurePass@123"
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "accessToken": "eyJ...",
    "refreshToken": "eyJ...",
    "user": { /* User schema */ },
    "role": "attendee"
  }
}
```

POST /auth/forgot-password

Send a password reset link/OTP.

Request Body:

```
{ "mobile": "+91 98765 43210" }
```

Response: 200

```
{ "success": true, "message": "Reset OTP sent" }
```

POST /auth/reset-password

Reset password using OTP.

Request Body:

```
{
  "mobile": "+91 98765 43210",
  "otp": "123456",
  "newPassword": "NewPass@456"
}
```

Response: 200

```
{ "success": true, "message": "Password updated" }
```

POST /auth/refresh

Refresh JWT access token.

Request Body:

```
{ "refreshToken": "eyJ..." }
```

Response: 200

```
{
  "success": true,
  "data": {
    "accessToken": "eyJ...",
    "refreshToken": "eyJ..."
  }
}
```

POST /auth/logout

Invalidate the current session.

Response: 200

```
{ "success": true }
```

POST /auth/select-role

Set the user's active role after login (called on /role-select screen).

Request Body:

```
{ "role": "attendee" }
```

Response: 200

```
{
  "success": true,
  "data": {
    "role": "attendee",
    "redirectTo": "/home"
  }
}
```

4. User & Profile

GET /users/me

Get the current user's full profile.

Response: 200

```
{
  "success": true,
  "data": {
    "user": { /* User schema */ },
    "role": "attendee",
    "selectedCity": "Mumbai",
    "organizer": { /* OrganizerProfile or null */ },
    "serviceProvider": { /* ServiceProviderProfile or null */ }
  }
}
---
```

PATCH /users/me

Update profile info (name, email, mobile).

Request Body:

```
{
  "fullName": "Arjun Kumar",
  "email": "newemail@example.com"
}
```

Response: 200

```
{ "success": true, "data": { /* updated User */ } }
---
```

PATCH /users/me/city

Update the user's selected city (used for home screen location-based events).

Request Body:

```
{ "city": "Goa" }
```

Response: 200

```
{ "success": true }
---
```

GET /users/me/stats

Aggregate dashboard statistics for the current user.

Response: 200

```
{
  "success": true,
  "data": {
    "bookedTicketsCount": 3,
    "serviceBookingsCount": 2,
    "acceptedInvitesCount": 1
  }
}
---
```

5. Events (Attendee)

GET /events

Browse all public events. Supports filtering and pagination.

Query Params:

Param | Type | Description

category | string | Music, Sports, Comedy, Nightlife, Arts, Performances, Festival, Wedding, Corporate

city | string | Filter by city

featured | boolean | Only featured events

search | string | Full-text search

page | int | Page number

limit | int | Items per page (default 20)

Response: 200

```
{
  "success": true,
  "data": [/* Array of EventData */],
  "meta": { "page": 1, "limit": 20, "total": 87 }
}
```

GET /events/featured

Get featured spotlight events for the hero carousel on home screen.

Response: 200

```
{
  "success": true,
  "data": [/* Array of EventData where featured=true */]
}
```

GET /events/nearby

Events in the user's currently selected city.

Query Params: city (required)

Response: 200

```
{ "success": true, "data": [/* EventData array */] }
```

GET /events/:id

Get a single event's full details including ticket tiers and seating layout.

Path Params: id — event ID

Response: 200

```
{
  "success": true,
  "data": { /* EventData schema with all fields */ }
}
```

GET /events/categories

Get list of all supported event categories.

Response: 200

```
{
  "success": true,
  "data": ["All", "Music", "Sports", "Comedy", "Nightlife", "Arts", "Performances", "Festival", "Wedding", "Corporate"]
}
```

GET /events/cities

Get list of all supported cities.

Response: 200

```
{
  "success": true,
  "data": ["Mumbai", "Delhi", "Bangalore", "Hyderabad", "Chennai", "Pune", "Kolkata", "Goa", "Jaipur", "Ahmedabad"]
}
```

GET /events/:id/seats

Get the seating layout for a specific event for the seat-selection screen.

Response: 200

```
{
  "success": true,
  "data": {
    "eventId": "E001",
    "sections": [/* Array of SeatSection */]
  }
}
---
```

POST /events/:id/seats/hold

Temporarily hold selected seats (pre-payment step, 10 min TTL).

Request Body:

```
{
  "sectionId": "section_vip",
  "seats": ["A1", "A2"]
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "holdId": "HOLD-XYZ",
    "expiresAt": "2026-08-26T12:10:00Z"
  }
}
---
```

DELETE /events/:id/seats/hold/:holdId

Release a seat hold (user navigates away or changes selection).

Response: 200

```
{ "success": true }
---
```

6. Tickets & Payments

POST /tickets/book

Complete a ticket booking after payment. Creates a BookedTicket and credits the organizer's wallet.

Request Body:

```
{
  "eventId": "E001",
  "sectionId": "section_vip",
  "seats": ["A1", "A2"],
  "seatCount": 2,
  "sectionName": "VIP",
  "pricePerSeat": 7500.0,
  "totalPrice": 15000.0,
  "platformFee": 300.0,
  "tax": 2700.0,
  "discount": 0.0,
  "grandTotal": 18000.0,
  "couponCode": null,
  "paymentMethod": "upi",
  "holdId": "HOLD-XYZ"
}
```

Response: 201

```
{
  "success": true,
  "data": {
    "ticket": { /* BookedTicket schema */ },
    "qrCode": "EVT-E001-ABCD1234"
  }
}
```

Side effects:

- Credits organizerWalletBalance by grandTotal
- Adds WalletTransaction (credit) to organizer
- Sends "Booking Confirmed" notification to attendee
- Decrements available count on the SeatSection

POST /tickets/validate-coupon

Validate a coupon code before applying.

Request Body:

```
{
  "code": "FIRST20",
  "eventId": "E001",
  "totalPrice": 15000.0
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "valid": true,
    "discountType": "percentage",
    "discountValue": 20,
    "discountAmount": 3000.0
  }
}
```

GET /tickets/my

Get all tickets booked by the current attendee.

Response: 200

```
{
  "success": true,
  "data": [/* Array of BookedTicket */]
}
```

GET /tickets/:id

Get details of a single booked ticket (for the ticket detail modal).

Response: 200

```
{ "success": true, "data": { /* BookedTicket */ } }
```

DELETE /tickets/:id

Cancel a booked ticket and initiate refund.

Request Body:

```
{ "reason": "Change of plans" }
```

Response: 200

```
{
  "success": true,
  "data": {
    "refundAmount": 18000.0,
    "referenceNo": "REF-1748524156000",
    "estimatedDays": "3-5 business days"
  }
}
```

Side effects:

- Removes ticket from user's list
- Sends "Booking Cancelled" notification

- Triggers refund pipeline

GET /tickets/:id/refund-status

Get the current status of a refund.

Response: 200

```
{
  "success": true,
  "data": {
    "bookingId": "1748524156000",
    "amount": 18000.0,
    "status": "processing",
    "steps": [
      { "title": "Cancellation Confirmed", "completed": true },
      { "title": "Refund Initiated", "completed": true },
      { "title": "Refund Processed", "completed": false }
    ]
  }
}
```

GET /payment-methods

Get saved payment methods for the current user.

Response: 200

```
{
  "success": true,
  "data": [
    { "id": "pm-1", "type": "upi", "label": "Google Pay", "identifier": "arjun@oksbi" },
    { "id": "pm-2", "type": "card", "label": "HDFC Visa", "last4": "4321" }
  ]
}
```

POST /payment-methods

Add a new payment method.

Request Body:

```
{
  "type": "upi",
  "upiId": "arjun@oksbi"
}
```

Response: 201

```
{ "success": true, "data": { /* PaymentMethod */ } }
```

DELETE /payment-methods/:id

Remove a saved payment method.

Response: 200

```
{ "success": true }
```

7. Services Marketplace (Attendee)

GET /services

Get all service groups and their categories.

Response: 200

```
{
  "success": true,
  "data": [
    {
      "id": "photography",

```

```

    "name": "Photography & Film",
    "services": [
      { "id": "photographer", "name": "Photographer", "description": "Candid & traditional", "icon": "camera" },
      { "id": "videographer", "name": "Videographer", "description": "Cinematic films", "icon": "video" },
      { "id": "photo-booth", "name": "Photo Booth", "description": "Fun & interactive", "icon": "aperture" }
    ]
  }
}
}

```

Full service group catalogue:

Group ID | Group Name | Service IDs

photography | Photography & Film | photographer, videographer, photo-booth

music-entertainment | Music & Entertainment | dj, live-band, mc-host, sound-system

food-catering | Food & Catering | caterer, bartender, food-truck, cake-artist

decor-ambiance | Decor & Ambiance | decorator, florist, lighting, balloon-artist

event-coordination | Event Coordination | planner, coordinator, invitation-designer

beauty-grooming | Beauty & Grooming | bridal-makeup, hair-stylist, nail-artist

security-logistics | Security & Logistics | security, valet-parking, bouncer

venue | Venues | banquet-hall, outdoor-venue, farmhouse

GET /services/:serviceId/vendors

Get all vendors for a specific service, with optional filters.

Path Params: serviceId — e.g. photographer

Query Params:

Param | Type | Description

city | string | Filter by city

maxBudget | number | Max budget filter

minRating | number | Minimum rating

availability | string | Available, Busy, On Leave

page | int | Page number

limit | int | Items per page

Response: 200

```

{
  "success": true,
  "data": [
    {
      "id": "v1",
      "businessName": "Kapil Sharma Photography",
      "fullName": "Kapil Sharma",
      "serviceCategory": "Photography",
      "rating": "4.8",
      "totalGigs": 24,
      "city": "Mumbai",
      "startingPrice": 15000,
      "bio": "10+ years of wedding photography.",
      "availability": "Available"
    }
  ]
}

```

GET /services/:serviceId/vendors/:vendorId

Get a vendor's full public profile for the Vendor Profile screen.

Response: 200

```

{
  "success": true,
  "data": {
    "id": "v1",
    "businessName": "Kapil Sharma Photography",
    "fullName": "Kapil Sharma",
  }
}

```

```

    "serviceCategory": "Photography",
    "rating": "4.8",
    "totalGigs": 24,
    "city": "Mumbai",
    "startingPrice": 15000,
    "bio": "10+ years candid & wedding photography.",
    "experienceYears": 10,
    "equipment": ["Canon EOS R5", "Sony A7III"],
    "servicesOffered": ["Wedding", "Corporate", "Birthday"],
    "availability": "Available",
    "socialLinks": { "instagram": "@kapilphoto" },
    "packages": [/* ServicePackage array */],
    "reviews": [/* Review array */],
    "portfolio": [/* Portfolio image URLs */],
    // Caterer-specific fields (present when serviceCategory is Catering)
    "menuTypes": ["North Indian", "South Indian", "Continental", "Desserts", "Live Chaat"],
    "maxGuests": 2000,
    // Note: for caterers, startingPrice is PER PLATE (not a flat fee)
    "pricingModel": "per_plate"
  }
}
---

```

8. Vendor Profiles

POST /vendors/:vendorId/save

Save a vendor to the user's saved list.

Response: 200

```

{ "success": true }
---

```

DELETE /vendors/:vendorId/save

Unsave a vendor.

Response: 200

```

{ "success": true }
---

```

GET /vendors/saved

Get all saved vendors for the current user (Saved screen).

Response: 200

```

{
  "success": true,
  "data": [/* Array of vendor summary objects */]
}
---

```

9. Service Bookings (Attendee → Vendor)

This is for when an attendee books a vendor directly from the marketplace (not through an organizer's service request).

POST /service-bookings

Book a vendor service directly.

Request Body:

```

{
  "serviceId": "photographer",
  "vendorId": "v1",
  "packageName": "Standard Package",
  "servicePrice": 25000.0,
  "platformFee": 500.0,
  "taxes": 4500.0,
  "total": 30000.0,
  "paymentMethod": "upi",
  "eventName": "My Wedding",
  "eventType": "Wedding",
  "eventDate": "2026-10-15",

```

```

    "startTime": "10:00 AM",
    "endTime": "6:00 PM",
    "venueName": "The Grand Ballroom",
    "city": "Mumbai",
    "guests": 200,
    "specialRequirements": "Extra lighting needed.",
    "visibility": "private"
  }

```

Response: 201

```

{
  "success": true,
  "data": { /* ServiceBooking schema */ }
}

```

GET /service-bookings/my

Get all service bookings for the current attendee.

Response: 200

```

{ "success": true, "data": [/* Array of ServiceBooking */] }

```

GET /service-bookings/:id

Get details of a single service booking (for the service booking detail modal).

Response: 200

```

{ "success": true, "data": { /* ServiceBooking */ } }

```

DELETE /service-bookings/:id

Cancel a service booking and initiate refund.

Request Body:

```

{ "reason": "Change of plans" }

```

Response: 200

```

{
  "success": true,
  "data": {
    "refundAmount": 30000.0,
    "referenceNo": "REF-SB001",
    "estimatedDays": "3-5 business days"
  }
}

```

10. Saved Items

GET /saved/events

Get all events saved by the current user.

Response: 200

```

{ "success": true, "data": [/* Array of EventData */ ] }

```

POST /saved/events/:eventId

Save an event.

Response: 200

```

{ "success": true }

```

DELETE /saved/events/:eventId

Unsave an event.

Response: 200

```
{ "success": true }
```

11. Invitations

POST /invitations

Organizer sends invitations to phone/email contacts for a private event. Creates multiple EventInvite records.

Request Body:

```
{
  "eventId": "E001",
  "contacts": ["+91 91234 56789", "+91 98765 00001"]
}
```

Response: 201

```
{
  "success": true,
  "data": {
    "sent": 2,
    "invites": [/* Array of EventInvite */]
  }
}
```

GET /invitations/my

Get all invitations for the current user (attendee view — Tickets screen → Invites tab).

Query Params: status — pending, accepted, declined, all

Response: 200

```
{ "success": true, "data": [/* Array of EventInvite */] }
```

GET /invitations/event/:eventId

Get all invitations for a specific event (organizer view).

Response: 200

```
{ "success": true, "data": [/* Array of EventInvite */] }
```

PATCH /invitations/:id/respond

Attendee accepts or declines an invitation.

Request Body:

```
{ "status": "accepted" }
```

Response: 200

```
{
  "success": true,
  "data": { /* updated EventInvite */ }
}
```

Side effects:

- Sends notification to attendee ("Invitation Accepted / Declined")

12. Notifications

GET /notifications

Get all notifications for the current user, newest first.

Query Params: type — booking, reminder, offer, quote, system, invite, all

Response: 200

```
{
  "success": true,
  "data": [/* Array of AppNotification */],
  "meta": { "unreadCount": 3 }
}
```

PATCH /notifications/:id/read

Mark a single notification as read.

Response: 200

```
{ "success": true }
```

PATCH /notifications/read-all

Mark all notifications as read.

Response: 200

```
{ "success": true }
```

13. Organizer — Onboarding & Verification

POST /organizer/onboard

Complete organizer onboarding (called from OrganizerOnboardingScreen).

Request Body:

```
{
  "fullName": "Ravi Kumar",
  "orgName": "Ravi Events Co.",
  "type": "Private",
  "city": "Mumbai",
  "state": "Maharashtra"
}
```

Response: 201

```
{
  "success": true,
  "data": {
    "organizer": { /* OrganizerProfile with status: 'unverified' */ }
  }
}
```

POST /organizer/verification

Submit KYC/verification documents (4-step form: Identity, Business, Bank, Experience).

Request Body:

```
{
  "identity": {
    "aadhaarNumber": "XXXX XXXX XXXX",
    "panNumber": "ABCDE1234F",
    "passportNumber": null,
    "licenseNumber": null
  },
  "business": {
    "orgName": "Ravi Events Co.",
    "website": "https://ravievents.com",
    "socialLinks": "@ravievents",
    "city": "Mumbai",
    "state": "Maharashtra"
  },
  "bank": {
    "holderName": "Ravi Kumar",
    "bankName": "HDFC Bank",
    "accountNumber": "123456789012",
  }
}
```

```

    "ifscCode": "HDFC0001234",
    "upiId": "ravi@hdfc"
  },
  "experience": {
    "previousEventsCount": 12,
    "portfolioUrl": "https://ravievents.com/portfolio"
  }
}

```

Response: 200

```

{
  "success": true,
  "data": {
    "status": "pending",
    "message": "Under review. Usually 24-48 hours."
  }
}

```

GET /organizer/verification/status

Get current verification status.

Response: 200

```

{
  "success": true,
  "data": {
    "status": "pending"
  }
}

```

Status values: unverified | pending | verified | rejected

GET /organizer/profile

Get the organizer's own profile/dashboard data.

Response: 200

```

{
  "success": true,
  "data": {
    "organizer": { /* OrganizerProfile */ },
    "kpiCards": {
      "walletBalance": 125000.0,
      "totalTicketsSold": 4800,
      "pendingQuotes": 2,
      "activeVendors": 3
    }
  }
}

```

14. Organizer — Events

GET /organizer/events

Get all events published by the organizer (both public and private).

Query Params: visibility — public, private, all

Response: 200

```

{ "success": true, "data": [/* Array of EventData */] }

```

POST /organizer/events

Publish a new event (5-step wizard: Venue → Services → Info → Tickets → Review).

Request Body:

```

{
  "title": "Sunburn Festival 2026",
  "description": "Asia's premier music festival.",
  "category": "Music",

```

```

"visibility": "public",
"date": "Dec 28, 2026",
"time": "6:00 PM",
"venue": "Candolim Beach",
"city": "Goa",
"linkedVenueId": "venue-001",
"venueStatus": "pending",
"imageKey": "concert",
"ticketTiers": [
  {
    "name": "General Admission",
    "price": 3500,
    "quantity": 500
  },
  {
    "name": "VIP",
    "price": 7500,
    "quantity": 100
  }
],
"seatingLayouts": [
  {
    "id": "section_vip",
    "name": "VIP",
    "price": 7500.0,
    "colorHex": 9519547,
    "rows": 5,
    "seatsPerRow": 10,
    "available": 50
  }
],
"selectedProviderIds": ["v1", "v3"]
}

```

Response: 201

```

{
  "success": true,
  "data": { /* EventData */ }
}

```

Side effects:

- If `visibility == 'private'` → sends "Private Event Created" notification
- If `visibility == 'public'` → sends "Event Published" notification
- If `linkedVenueId` is set → creates a venue `ServiceRequest` with status `Quote Requested`

GET /organizer/events/:id

Get full detail of one organizer event (5 tabs: Venue, Services, Info, Tickets/Invites, Overview).

Response: 200

```

{
  "success": true,
  "data": {
    "event": { /* EventData */ },
    "serviceRequests": [/* Array of ServiceRequest */],
    "bookedTickets": [/* Array of BookedTicket */],
    "invitations": [/* Array of EventInvite if private */],
    "overview": {
      "ticketsSold": 320,
      "ticketRevenue": 1120000.0,
      "activeVendors": 3,
      "pendingQuotes": 1,
      "totalVendorSpend": 75000.0
    }
  }
}

```

PATCH /organizer/events/:id

Update event info (title, description, category, visibility).

Request Body:

```

{
  "title": "Sunburn Festival 2026 – Updated",
  "description": "Updated description.",
  "category": "Music",

```

```
    "visibility": "public"
  }
```

Response: 200

```
{ "success": true, "data": { /* updated EventData */ } }
```

DELETE /organizer/events/:id

Cancel / delete an event.

Response: 200

```
{ "success": true }
```

15. Organizer — Service Requests

These are requests the organizer sends to service providers for specific events.

GET /organizer/service-requests

Get all service requests created by the organizer.

Response: 200

```
{ "success": true, "data": [/* Array of ServiceRequest */] }
```

POST /organizer/service-requests

Create a new service request for a specific event and category.

Request Body:

```
{
  "eventId": "E001",
  "categoryId": "photographer",
  "categoryName": "Photography",
  "budget": 30000.0,
  "professionals": 2,
  "duration": "8 hours",
  "notes": "Need candid & traditional shots.",
  "vendorId": "v1"
}
```

Response: 201

```
{
  "success": true,
  "data": { /* ServiceRequest with status: 'Quote Requested' */ }
}
```

PATCH /organizer/service-requests/:id

Update a service request (e.g., change status, select vendor after receiving quotes).

Request Body:

```
{
  "status": "Vendor Selected",
  "vendorId": "v1",
  "vendorName": "Kapil Sharma Photography"
}
```

Response: 200

```
{ "success": true, "data": { /* updated ServiceRequest */ } }
```

DELETE /organizer/service-requests/:id

Cancel / remove a service request.

Response: 200

```
{ "success": true }
```

GET /organizer/services/categories

Get list of service categories the organizer can request.

Response: 200

```
{
  "success": true,
  "data": ["Photography", "Catering", "DJ / Sound", "Decoration", "Security", "Videography", "MC / Host", "Stage & Lighting"]
}
```

GET /organizer/services/providers/:categoryId

Get a list of available vendors for a given service category (organizer's browse view).

Response: 200

```
{ "success": true, "data": [/* Array of vendor summary objects */] }
```

GET /organizer/services/vendors/:categoryId/:providerId

Get a vendor's full profile from the organizer's perspective.

Response: 200

```
{ "success": true, "data": { /* Full ServiceProviderProfile */ } }
```

16. Organizer — Wallet

GET /organizer/wallet

Get the organizer's wallet balance and transaction history.

Response: 200

```
{
  "success": true,
  "data": {
    "balance": 125000.0,
    "totalEarned": 820000.0,
    "pendingAmount": 25000.0,
    "transactions": [/* Array of WalletTransaction */]
  }
}
```

POST /organizer/wallet/payout

Request a payout to the linked bank account.

Request Body:

```
{
  "amount": 100000.0
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "transaction": { /* WalletTransaction (debit) */,
    "newBalance": 25000.0,
    "estimatedDays": "2 business days"
  }
}
```

Business rule: Amount must be $\leq$ current balance.

17. Organizer — Guest List & QR Scan

GET /organizer/events/:id/guests

Get the guest list for an event (for the Guest List screen).

Query Params:

- status — all, pending, checked-in
- search — search by name, email, or ticket ID

Response: 200

```
{
  "success": true,
  "data": [
    {
      "id": "TKT-1001",
      "name": "John Doe",
      "email": "john@example.com",
      "type": "VIP",
      "status": "Pending"
    }
  ]
}
```

PATCH /organizer/events/:id/guests/:ticketId/check-in

Manually check in a guest (from the guest list screen, without scanning).

Response: 200

```
{
  "success": true,
  "data": {
    "ticketId": "TKT-1001",
    "status": "Checked In",
    "checkedInAt": "2026-08-26T18:30:00Z"
  }
}
```

POST /organizer/events/:eventId/scan

Validate a scanned QR code and check in the attendee.

Request Body:

```
{
  "qrCode": "EVT-E001-ABCD1234"
}
```

Response: 200 (Valid)

```
{
  "success": true,
  "data": {
    "valid": true,
    "ticket": { /* BookedTicket */ },
    "attendeeName": "Arjun Sharma",
    "ticketType": "VIP",
    "alreadyCheckedIn": false
  }
}
```

Response: 200 (Invalid)

```
{
  "success": true,
  "data": {
    "valid": false,
    "reason": "Ticket not found"
  }
}
```

18. Service Provider — Onboarding

POST /service-provider/onboard

Complete service provider onboarding (single-form screen).

Request Body (Service Provider):

```
{
  "fullName": "Kapil Sharma",
  "businessName": "Kapil Sharma Photography",
  "email": "kapil@example.com",
  "mobile": "+91 98765 00001",
  "city": "Mumbai",
  "serviceCategory": "Photography",
  "bio": "10+ years of candid & wedding photography.",
  "experienceYears": 10,
  "equipment": ["Canon EOS R5", "Sony A7III"]
}
```

Request Body (Venue Provider — serviceCategory is in venue group):

```
{
  "fullName": "Mohan Banquet",
  "businessName": "Mohan Grand Banquet",
  "email": "info@mohanbq.com",
  "mobile": "+91 98765 11111",
  "city": "Mumbai",
  "serviceCategory": "Banquet Hall",
  "capacity": 500,
  "address": "123, Andheri West, Mumbai",
  "seatingLayout": "Banquet Style",
  "amenities": ["AC", "Parking", "Catering", "DJ System"]
}
```

Response: 201

```
{
  "success": true,
  "data": {
    "serviceProvider": { /* ServiceProviderProfile */ }
  }
}
```

Business Rule: Status is auto-set to verified on onboarding (from the mock logic — status: 'verified').

GET /service-provider/profile

Get the service provider's own profile.

Response: 200

```
{ "success": true, "data": { /* ServiceProviderProfile */ } }
```

PATCH /service-provider/profile

Update the service provider's profile.

Request Body:

```
{
  "bio": "Updated bio.",
  "availability": "Busy",
  "startingPrice": 20000,
  "servicesOffered": ["Wedding", "Corporate"],
  "equipment": ["Canon EOS R5"],
  "socialLinks": { "instagram": "@kapilphoto" }
}
```

Response: 200

```
{ "success": true, "data": { /* updated ServiceProviderProfile */ } }
```

19. Service Provider — Requests

GET /service-provider/requests

Get all service requests directed at this vendor (both from organizers and attendees).

Query Params: status — Quote Requested, Confirmed, Vendor Selected, Cancelled, all

Response: 200

```
{
  "success": true,
  "data": {
    "serviceRequests": [/* Array of ServiceRequest (from organizers) */],
    "venueRequests": [/* Array of ServiceRequest constructed from event.linkedVenueId matches */],
    "directBookings": [/* Array of ServiceBooking (from attendees) */]
  }
}
```

POST /service-provider/requests/:id/quote

SP submits a quote for a pending service request. Changes status from Quote Requested → Quotes Received. Also auto-blocks the event date on the SP's calendar.

Request Body:

```
{
  "price": 28000.0
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "request": { /* ServiceRequest with status: 'Quotes Received' and vendorPrice set */ },
    "calendarDateBlocked": "2026-12-28"
  }
}
```

POST /service-provider/requests/:id/accept

SP accepts and confirms a booking. Status changes to Confirmed. Credits SP wallet.

Request Body:

```
{
  "price": 28000.0
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "request": { /* ServiceRequest with status: 'Confirmed' */ },
    "walletCredited": 28000.0,
    "newSpBalance": 210000.0
  }
}
```

Side effects:

- Adds WalletTransaction (credit) to SP
- Sends "Booking Accepted" notification to SP
- Auto-blocks event date in SP's calendar

POST /service-provider/requests/:id/decline

SP declines a request.

Response: 200

```
{
  "success": true,
  "data": { /* ServiceRequest with status: 'Cancelled' */ }
}
```

20. Service Provider — Calendar

GET /service-provider/calendar

Get the SP's calendar state: blocked dates, calendar entries, and booked gig dates.

Response: 200

```
{
  "success": true,
  "data": {
    "blockedDates": ["2026-10-15", "2026-11-02"],
    "calendarEntries": [/* Array of CalendarEntry */],
    "gigDates": ["2026-12-28"]
  }
}
```

POST /service-provider/calendar/block

Block a date so no bookings can be made.

Request Body:

```
{ "date": "2026-10-20" }
```

Response: 200

```
{ "success": true }
```

DELETE /service-provider/calendar/block/:date

Unblock a previously blocked date.

Path Params: date — yyyy-MM-dd

Response: 200

```
{ "success": true }
```

POST /service-provider/calendar/entries

Create a custom calendar note/entry.

Request Body:

```
{
  "date": "2026-10-15",
  "title": "Wedding Shoot",
  "note": "Client: Sharma Wedding. Venue: Grand Ballroom.",
  "type": "event"
}
```

Response: 201

```
{ "success": true, "data": { /* CalendarEntry */ } }
```

DELETE /service-provider/calendar/entries/:id

Remove a calendar entry.

Response: 200

```
{ "success": true }
```

21. Service Provider — Packages

GET /service-provider/packages

Get all service packages defined by the SP.

Response: 200

```
{
  "success": true,
  "data": [/* Array of ServicePackage */],
  "meta": {
    "totalBookings": 40,
  }
}
```

```
    "totalRevenue": 820000.0
  }
}
```

POST /service-provider/packages

Create a new service package.

Request Body:

```
{
  "name": "Premium Package",
  "price": 45000.0,
  "type": "Premium",
  "description": "Full-day coverage with 2 cinematographers.",
  "features": ["2 Photographers", "Full Day", "500 Edited Photos", "Drone Shots", "Album"]
}
```

Response: 201

```
{ "success": true, "data": { /* ServicePackage */ } }
```

PATCH /service-provider/packages/:id

Update an existing package.

Request Body:

```
{
  "name": "Updated Name",
  "price": 50000.0,
  "description": "Updated description.",
  "features": ["Updated feature 1"]
}
```

Response: 200

```
{ "success": true, "data": { /* updated ServicePackage */ } }
```

PATCH /service-provider/packages/:id/toggle

Toggle a package active/inactive.

Response: 200

```
{
  "success": true,
  "data": { "active": false }
}
```

POST /service-provider/packages/:id/duplicate

Create a copy of a package.

Response: 201

```
{ "success": true, "data": { /* new ServicePackage (copy) */ } }
```

DELETE /service-provider/packages/:id

Delete a package.

Response: 200

```
{ "success": true }
```

22. Service Provider — Reviews

GET /service-provider/reviews

Get all reviews for the SP's profile.

Query Params:

- rating — 1, 2, 3, 4, 5, all
- sort — recent, high, low

Response: 200

```
{
  "success": true,
  "data": {
    "reviews": [/* Array of Review */],
    "summary": {
      "averageRating": 4.8,
      "totalReviews": 3,
      "ratingBreakdown": { "5": 2, "4": 1, "3": 0, "2": 0, "1": 0 },
      "positiveTags": ["Professional", "On Time", "Great Quality", "Friendly Service"],
      "improvementTags": ["Communication", "Response Time"]
    }
  }
}
---
```

POST /service-provider/reviews/:id/reply

SP replies to a review.

Request Body:

```
{ "reply": "Thank you Rahul! It was a pleasure." }
```

Response: 200

```
{ "success": true, "data": { /* updated Review */ } }
---
```

DELETE /service-provider/reviews/:id

SP deletes a review (only reviews on their own profile).

Response: 200

```
{ "success": true }
---
```

POST /write-review/:vendorId

Attendee/organizer submits a review for a vendor (Write Review screen).

Request Body:

```
{
  "bookingId": "SB-001",
  "rating": 5,
  "comment": "Absolutely brilliant service.",
  "eventType": "Wedding",
  "packageName": "Standard Package"
}
```

Response: 201

```
{ "success": true, "data": { /* Review */ } }
---
```

23. Service Provider — Portfolio

GET /service-provider/portfolio

Get the SP's portfolio media and bio details.

Response: 200

```
{
  "success": true,
  "data": {
    "bio": "10+ years of candid photography.",
    "experienceYears": 10,
  }
}
```

```

    "startingPrice": 15000,
    "servicesOffered": ["Wedding", "Corporate"],
    "equipment": ["Canon EOS R5"],
    "socialLinks": { "instagram": "@kapilphoto" },
    "portfolioImages": [
      { "id": "img-1", "url": "https://...", "caption": "Wedding Shot" }
    ]
  }
}

```

PATCH /service-provider/portfolio

Update portfolio details (Portfolio Edit screen).

Request Body:

```

{
  "bio": "Updated bio text.",
  "experienceYears": 11,
  "startingPrice": 18000,
  "servicesOffered": ["Wedding", "Corporate", "Birthday"],
  "equipment": ["Canon EOS R5", "Sony A7III"],
  "socialLinks": { "instagram": "@kapilphoto", "website": "https://kapilphoto.com" }
}

```

Response: 200

```

{ "success": true, "data": { /* updated portfolio data */ } }

```

POST /service-provider/portfolio/images

Upload a portfolio image.

Request: multipart/form-data

- image (file)
- caption (string, optional)

Response: 201

```

{
  "success": true,
  "data": { "id": "img-2", "url": "https://...", "caption": "" }
}

```

DELETE /service-provider/portfolio/images/:id

Remove a portfolio image.

Response: 200

```

{ "success": true }

```

24. Service Provider — Seating Manager

For venue-type service providers who define their own seating layouts.

GET /service-provider/seating

Get all seat sections defined by this SP.

Response: 200

```

{
  "success": true,
  "data": [/* Array of SeatSection */]
}

```

POST /service-provider/seating

Add a new seating section.

Request Body:

```
{
  "name": "VIP",
  "rows": 5,
  "seatsPerRow": 10,
  "price": 7500.0,
  "colorHex": 9519547
}
```

Response: 201

```
{
  "success": true,
  "data": { /* SeatSection */ }
}
```

PATCH /service-provider/seating/:id

Update a seating section.

Request Body:

```
{
  "price": 8000.0,
  "available": 45
}
```

Response: 200

```
{ "success": true, "data": { /* updated SeatSection */ } }
```

DELETE /service-provider/seating/:id

Remove a seating section.

Response: 200

```
{ "success": true }
```

25. Service Provider — Wallet

GET /service-provider/wallet

Get the SP's wallet balance and transaction history.

Response: 200

```
{
  "success": true,
  "data": {
    "balance": 182000.0,
    "totalEarned": 350000.0,
    "transactions": [/* Array of WalletTransaction */]
  }
}
```

POST /service-provider/wallet/withdraw

Request a withdrawal to the linked bank account.

Request Body:

```
{
  "amount": 100000.0
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "withdrawn": 100000.0,
    "platformFee": 2000.0,
    "totalDeducted": 102000.0,
    "newBalance": 80000.0,
  }
}
```

```

    "transactions": [/* debit transaction + fee transaction */]
  }
}

```

Business rule: Platform fee = 2% of withdrawn amount. Both the withdrawal and fee are added as separate debit transactions.

26. Venues & Banquet Halls

GET /venues

Browse all venues.

Query Params:

Param | Type | Description

city | string | Filter by city

venueType | string | Outdoor, Indoor, etc.

minCapacity | int | Minimum capacity

maxPrice | number | Max price per day

search | string | Search by name

Response: 200

```

{ "success": true, "data": [/* Array of VenueData */] }

```

GET /venues/:id

Get full details of a venue.

Response: 200

```

{ "success": true, "data": { /* VenueData with seatingLayouts */ } }

```

POST /venues/:id/booking-request

Send a venue booking inquiry for a specific event (used by organizer when creating an event with a linked venue).

Request Body:

```

{
  "eventId": "E001",
  "eventDate": "Dec 28, 2026",
  "eventTitle": "Sunburn Festival"
}

```

Response: 201

```

{
  "success": true,
  "data": {
    "venueRequestId": "venue_E001",
    "status": "pending"
  }
}

```

GET /banquet-halls

Browse banquet halls with filtering options.

Query Params:

Param | Type | Description

city | string | Filter by city

minCapacity | int | Minimum capacity

maxCapacity | int | Maximum capacity

timeSlot | string | morning, afternoon, evening, full-day

venueType | string | indoor, outdoor, rooftop, poolside, garden

Response: 200

```
{ "success": true, "data": [/* Array of VenueData (banquet halls) */] }
```

GET /banquet-halls/:id

Get full details of a banquet hall including availability and pricing tiers.

Response: 200

```
{
  "success": true,
  "data": {
    "hall": { /* VenueData */ },
    "availability": {
      "availableDates": ["2026-09-15", "2026-09-16"],
      "blockedDates": ["2026-09-14"]
    },
    "timeSlotPricing": {
      "morning": { "hours": "7am-1pm", "multiplier": 0.6 },
      "afternoon": { "hours": "1pm-7pm", "multiplier": 0.65 },
      "evening": { "hours": "7pm-1am", "multiplier": 0.85 },
      "fullDay": { "hours": "7am-1am", "multiplier": 1.0 }
    }
  }
}
```

POST /banquet-halls/:id/check-availability

Check if a banquet hall is available for specific dates/times.

Request Body:

```
{
  "date": "2026-12-28",
  "timeSlot": "evening"
}
```

Response: 200

```
{
  "success": true,
  "data": {
    "available": true,
    "price": 127500.0
  }
}
```

27. Search

GET /search

Global search across events, venues, vendors, and banquet halls.

Query Params:

Param | Type | Description

q | string | Search query (required)

type | string | events, venues, vendors, all

city | string | City filter

Response: 200

```
{
  "success": true,
  "data": {
    "events": [/* Array of EventData */],
    "venues": [/* Array of VenueData */],
    "vendors": [/* Array of vendor summaries */],
    "banquetHalls": [/* Array of VenueData (banquet halls) */]
  }
}
```

28. Shared — Disputes & Reviews

POST /disputes

File a dispute for a booking (Dispute Resolution screen).

Request Body:

```
{
  "bookingId": "SB-001",
  "bookingType": "service",
  "reason": "Vendor No-Show",
  "description": "The photographer never arrived at the event despite confirmation."
}
```

Reason values: Vendor No-Show, Poor Quality of Service, Payment Dispute, Unprofessional Behavior, Other

Response: 201

```
{
  "success": true,
  "data": {
    "disputeId": "DSP-001",
    "status": "open",
    "message": "Our support team will contact you within 24-48 hours."
  }
}
```

GET /disputes/:id

Get the status of a dispute.

Response: 200

```
{
  "success": true,
  "data": {
    "id": "DSP-001",
    "status": "under_review",
    "createdAt": "2026-08-26T12:00:00Z"
  }
}
```

Status values: open | under_review | resolved | rejected

29. Shared — Settings & Help

GET /settings

Get user preferences and settings.

Response: 200

```
{
  "success": true,
  "data": {
    "notifications": {
      "bookings": true,
      "reminders": true,
      "offers": false,
      "invites": true
    },
    "privacy": {
      "profileVisible": true
    },
    "theme": "dark"
  }
}
```

PATCH /settings

Update user preferences.

Request Body:

```
{
  "notifications": {
    "offers": true
  },
  "theme": "light"
}
```

Response: 200

```
{ "success": true }
```

POST /help/feedback

Submit user feedback (from the profile screen "Send Feedback" option).

Request Body:

```
{
  "rating": 5,
  "message": "Great app! Love the dark theme."
}
```

Response: 201

```
{ "success": true, "message": "Thank you for your feedback!" }
```

GET /help/faqs

Get FAQ items for the Help & Support screen.

Response: 200

```
{
  "success": true,
  "data": [
    {
      "id": "faq-1",
      "question": "How do I cancel a booking?",
      "answer": "Go to My Tickets, select the ticket and tap Cancel."
    }
  ]
}
```

POST /help/contact

Submit a support request.

Request Body:

```
{
  "subject": "Payment not received",
  "description": "I cancelled my ticket 3 days ago but have not received my refund.",
  "bookingId": "1748524156000"
}
```

Response: 201

```
{
  "success": true,
  "data": {
    "ticketId": "SUP-001",
    "message": "Our team will respond within 24 hours."
  }
}
```

30. Enums & Reference Values

Role

Value | Description

attendee | Event attendee

organizer | Event organizer

service | Service provider

Event Visibility

Value | Description
